

Reactors

Operating conditions

-  at pressure
-  blanketing and/or sterile

Capacity

-  up to 150.000 liters

Structure

-  conical/dished bottom on skirt

Temperature control

-  2"-3" half-pipe

Agitation system

-  vertical
-  eccentric
-  magnetic

Washing systems

-  rotating/static washing balls
-  lateral/bottom washing
-  washing turbines
