

Storage tanks

Operating conditions

-  atmospheric
-  blanketing and/or sterile

Capacity

-  up to 300.000 liters

Structure

-  conical bottom onto legs
-  inclined plane bottom onto legs
-  inclined plane bottom on reinforced concrete base
-  inclined plane bottom onto selfsupporting base
-  conical/dished bottom on skirt

Temperature control

-  high-efficiency pressed wrinkled jacket
-  "french-type" channel

Agitation system

-  lateral
-  vertical
-  eccentric

Washing systems

-  rotating/static washing balls
